Black Chassis, Black Cabinet
+ Black Grille Cloth

15Ω 1/2 watt resistor
from B+ center tap
to ground;
may not be
original?
?!

Notes: All Coupling Caps .015
@ 400 volt (under-rated?)
Mic Input was messed
with, 47K may not be correct

1st Filter Stage Resistor prone
to overheating/drift; ditto for Cathode Resistor (7591)

Internal 1/2 amp fuse (slow Blow)

Volume control has integral
on-off switch, may radiate
noise into audio circuitry.

150Ω on output may not
